

Project Initialization and Planning Phase

Team ID	MCA
Project Name	Smartphone Usage, Digital Addiction & Well-Being Analytics
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

The rapid growth of smartphones and digital applications has made them an essential part of everyday life. People use smartphones for communication, education, entertainment, social media, online shopping, and other activities. However, excessive and uncontrolled smartphone usage may lead to digital addiction and can negatively affect a person's sleep, productivity, physical activity, social interaction, and overall well-being. The main problem is that it is difficult to understand the relationship between **smartphone usage patterns and an individual's well-being** using only general observations. Different people may have different usage habits, screen times, app preferences, sleep patterns, and levels of digital dependence.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A smartphone user.	Understand how much time I spend using my smartphone and which activities consume most of my screen time.	It is difficult to identify patterns of excessive usage from raw usage data.	Usage information may be spread across different applications, activities, and time periods.	Concerned about whether my smartphone usage is becoming excessive.
PS-2	A smartphone user interested in maintaining a healthy digital lifestyle.	Understand the relationship between smartphone usage and factors such as sleep, physical activity, productivity,	The relationship between digital habits and well-being is not easy to	Different users have different screen-time patterns, app preferences, sleep habits, and daily activities.	Uncertain about how my smartphone habits may be affecting my overall well-being.

		and well-being.	underst and without analyzi ng the data.
