Data Quality Report Template

The Data Quality Report identifies the major data quality issues found in the selected smartphone usage dataset. The issues are classified according to their severity, and appropriate technical solutions are provided to improve the accuracy and reliability of the dataset.

Data Source	Data Quality Issue	Severity	Resolution Plan
Dataset	Missing values in some smartphone usage or well-being fields such as screen time, sleep duration, or stress level.	Moderate	Identify missing values using Power Query and replace them using appropriate statistical values such as mean/median or remove records when necessary.
Dataset	Duplicate user records may be present in the dataset.	Moderate	Use Remove Duplicates in Power Query based on the appropriate user identifier or combination of relevant columns.
