The dashboard for **Smartphone Usage, Digital Addiction & Well-Being Analytics** is designed to present smartphone usage, digital addiction, and well-being information in a clear and interactive manner. Power BI is used to create visualizations, filters, slicers, and interactive elements that help users understand important patterns in the data.

## Activity 1: Interactive and visually appealing dashboards

The dashboard for **Smartphone Usage, Digital Addiction & Well-Being Analytics** is designed to present smartphone usage, digital addiction, and well-being information in a clear and interactive manner. Power BI is used to create visualizations, filters, slicers, and interactive elements that help users understand important patterns in the data.

- ❖ Clear and Intuitive Layout
- ❖ Use Appropriate Visualizations
- ❖ Colour and Theming
- ❖ Interactive Filters and Slicers
- ❖ Drill-Down Capabilities
- ❖ Responsive Design

- **Major Outcomes from the Smartphone Usage, Digital Addiction & Well-Being Dashboard:**

- **Total Users:** The dashboard records 7,500 users, providing the overall user population analyzed in the project.
- **Weekend Screen Time:** The average weekend screen time is 9.24 hours, indicating substantial smartphone usage during weekends in the analyzed dataset.
- **Sleep Duration:** The overall average sleep duration shown on the dashboard is 6.74 hours.
- **Addiction-Level Distribution:** The dashboard shows 2.87K users in the Moderate addiction category (38.32%), 2.43K in Severe (32.45%), 1.37K in Mild (18.31%), and 0.82K in None (10.92%).
- **Age-Group Distribution:** The dashboard shows approximately 3.69K users aged 20–29 (49.23%), 2.57K aged 30–39 (34.29%), and 1.24K under 20 (16.53%).
- **Screen Time by Gender:** Average daily screen time is approximately 7.6 hours for Male, 7.5 hours for Other, and 7.4 hours for Female users.
- **Weekend Screen Time by Addiction Status:** The dashboard shows approximately 10.2 hours for Addicted users and approximately 7.0 hours for Not addicted users.
